Grading is an art and not a science. The grades herein represent our opinion based on our experience. Therefore, it is possible that two people will not always grade the same item alike. Also, as market conditions change, grading standards change, and may continue to do so in the future. Your examination of the item(s) should be the criterion and not the grade represented by another. In any purchase or sale, the value of the item(s) is determined by the price. Catalogue price descriptions are only estimates as determined by SUPERIOR for the convenient reference of bidders and should not be relied upon as actual statement or prediction of current market value which is determined by auction sale.

Instructions for New Mail Bidders

If you have never used our mail bid system, here is an explanation. The procedure is quite simple. On the enclosed Mail Bid Form there is space provided for the lot number and the amount you are willing to bid. After carefully reading the description of the lot you wish to bid on, write down the lot number and the maximum amount you are willing to pay. For example, let us assume you are interested in bidding on Lot 1 and the maximum amount you are willing to bid is \$350.00, your bid sheet should be as shown on the right.

The bid which you enter is the “maximum amount” or top price that you are willing to pay for a lot (unless you have checked one of the percentage increase boxes). However, there is always the possibility that you may obtain the lot for less.

Before mailing, check your bid sheet for accuracy. Make certain that you bid on the correct lot and that your bid is the maximum you are willing to pay.

Many rarities are obtained through the medium of auctions and it can be a very exciting as well as a rewarding method of obtaining wonderful items for your collection. We look forward to your participation in our sale.

Thank you,
The Auction Department
